HP Smart

App Overview

Printing is an integral component of any workflow. Troubleshooting and managing conventional printers with no remote access has always been a nightmare. However, this is a thing of the past with the HP printers. With the HP Smart app, you can set up, manage, view, share, and print remotely from your HP printer.

With the HP Smart app, you can as well scan and share your documents. The HP app integrates with cloud services such as iCloud, Dropbox, and HP cloud. Just as its name, the HP Smart app is intuitive by nature. The HP Smart app offers the most remote feedback to the user. With a stable network connection, you can view the paper levels, open doors, offline status, and ink levels on your printer.

The HP Smart Tasks in this app are impeccable. The Smart Task feature allows you to save specific workflows as one-touch buttons. Tasks such as scanning, printing, and emailing thus get automated at the home screen. The HP Smart app User Interface (UI) is an appealing tile format.

You can either focus on the most basic processes or engage in customizations such as design. On the same note, the HP Smart app UI is flexible for modifications. As the user, you can customize the dashboard by selecting and rearranging the icons on the home screen. You can modify the app's status bar as well.

The HP Smart app requires iOS 12.0 and later.
